Countrystyle are able to fully assess the loads upon tipping of the waste. Each load will then be classified into one of the specifications described below, the customer will be advised and the relevant charges or actions will be applied.

Specification 1

This applies to green waste loads that contain any acceptable material that is no greater than 200 millimetres in diameter.

Specification 2

This applies to green waste loads that contain any acceptable material that is between 200 and 500 millimetres in diameter.

Specification 3

This applies to green waste loads that contain any acceptable material greater than 500 millimetres in diameter. Countrystyle reserve the right to apply a reload charge.

Specification 4

Loads may be rejected if they are found to contain unacceptable items described below. A reload and relevant disposal charge will apply.

UNACCEPTABLE ITEMS

- Packaging waste / glossy magazines
- Hardcore / concrete / cement / tiles / ceramics / bricks
- Soil comprising of more than 1% by weight of any load delivered
- Wire strapping, metal, textiles or other materials that may damage or block processing comprising more than 1% by weight in any load delivered
- Timber that has been painted or treated with preservative
- Plastic bags or similar containers
- Japanese Knot Weed
- Household wastes other than those described in the above
- Materials deemed as general waste or hazardous

Materials outside this specification may be charged at prevailing disposal rates.
